# ARCHAEOLOGY MENTORSHIP

The Association for Washington Archaeology (AWA) has established a Mentorship Program and we are welcoming new members to join! Our goal is to help students and new professionals begin their careers by connecting them with established or retired professionals in fields that impact archaeology in Washington and the Pacific Northwest.

Mentors will be matched with mentees based on areas of expertise and interest. By connecting mentees with mentors capable of providing guidance on topics related to research and careers in archaeology, mentees can expect to leave this program with newfound skills and insight relevant to their future careers within the region.

In addition, this program will provide mentors with a unique opportunity to exchange new ideas and perspectives with others, and will foster a meaningful connection to the next generation of scholars!

Learn more about this program by visiting [our website](#).
